

***Box24***

**First Asset Multiplication Protocol**  
Get reward in every 10 minutes!

# INTRODUCTION

## INTRODUCTION

\$B24 is a Bep20 token with Asset Multiplication Protocol in every 10 minutes over the lifespan of 24 years until the maximum supply of 3.24 Billion tokens has been reached.

### Is B24 just another Titano Fork?

The entire protocol's smart contract is written and developed from scratch by our own competent team of developers. It does not contain any resemblance to Titano's code or operation as Box24 follows a completely new and different set of mechanics which allows for complete protocol sustainability.

We also have several proprietary mechanisms in place that we have created ourselves which offers many improvements over our competition such as; our B24 Auto-Liquidity Engine (BALE), the B24 Insurance Fund (BIF), our Longterm Interest Box (LIB), aswell as safeguards in place which secure against malicious hack attempts. Box24's tokenomics are also completely unique with our Auto-Burn burning Pit structure, minimal starting supply and lower 10 minute Epoch's for a much more linear APY progression of attainability.

**Box24**

Box24 provides a decentralized financial asset which rewards its users with 0.018% increase in their assets, every 10 minutes. The B24 reward generation is a unique protocol that has advanced profit making. The B24 rewarding protocol generates and distributes a 0.018% reward every 10 minutes for all active users. The protocol equips RFI properties. This protocol is equipped with innovative technologies and features that other forks lack. It is specially designed to be automated and efficient.

## **Box24 rebase tokenomics**

To support its price and rebase rewards, the Box24 employs a complex set of factors. It includes the \$B24 Box Insurance Fund (BIF), which acts as an insurance fund to ensure the B24 Protocol's price stability and long-term viability by maintaining a consistent 0.018 percent rebase rate paid to all \$B24 token holders every 10 minutes.

### **Staking - Easy and Safe**

The B24 tokens always stay in your wallet; it doesn't need to be put into the high risk staking contract. All you need to do is buy & hold it and automatically multiply rewards in your own wallet so there's no need to learn about the stake/unstake mechanism and also avoid paying an additional tax fee on staking operations.

### **Box insurance fund**

The \$B24 Insurance Fund, abbreviated BIF, is a separate wallet in B24's CAP system. The BIF employs an algorithm that underpins the Rebase Rewards and is funded by a portion of the buy and sell trading fees accumulated in the BIF wallet. Simply put, the BIF parameter backs the staking rewards (rebase rewards) that are distributed every 10 minutes at a rate of 0.018 percent, ensuring a high and stable interest rate to \$B24 token holders.

### **Reduction of risk associated with downside**

Ensuring long term growth continuity by maintaining constant growth levels Ensuring price stability through rebase strategy

### **B24 Treasury**

The Treasury is very important in the B24 protocol. It performs three critical functions for the growth and long-term viability of Box24. The treasury serves as an additional source of funding for the BIF. This additional support could be useful if the \$B24 token's price falls dramatically. It contributes to the establishment of a floor price for the \$B24 token.

### **The Burning Pit**

The burning Pit consumes 1.0 percent of all \$B24 traded. The more that is traded, the more that is added to the fire, causing the fire pit to grow in size, larger and larger through self-fulfilling Auto-Compounding, reducing the circulating supply and maintaining the Box24 protocol stable.

### **Liquidity management**

Liquidity can be thought of as a large pool of money that is split into half between \$B24 and \$BNB tokens. There is a conversion ratio that is set to the amount of \$B24 that can be obtained through BNB.

### **APY formulation for Box24**

The Box24 protocol follows daily-interest compounding simple formulation Where. A is the future value of your investment P is the principle investment r is the interest rate in decimals n is the number of time interest compounded in the given time t is the total time period for investment maturity It should be noted that rate r and time t should be expressed in the same time units, such as months or years. Time conversions based on a 365-day year have 30.4167 days/month and 91.2501 days/quarter. There are 360 days in a year, with 30 days per month and 90 days per quarter. In the present case: If the user invests \$1000 worth \$B24 for a period of 1 year at 0.018% compounding every 10 minutes. He will have \$1,284,615.72 B24 after his investment maturity.

# ROADMAP

## ROADMAP

### PHASE I

- ✓ Website Development
- ✓ Whitepaper Documentation
- ✓ Build Phase - Smart Contract
- ✓ Build Phase - dApp V1 Dashboard
- ✓ Deployment Phase - Smart Contract - Testnet
- ✓ Audit
- ✓ Deployment Phase - Smart Contract Deployment - Mainnet
- ✓ Deployment Phase - dApp V1 Dashboard
- ✓ PR Marketing
- ✓ Bounty Campaign

### PHASE II

- ✓ Pre-Launch Marketing
- ✓ Fair Launch on PinkSale
- ✓ PinkLock Liquidity Locked 1 year
- ✓ Twitter Marketing Campaign
- ✓ YouTube Marketing Campaign
- CoinMarketCap Listing
- Certik Application
- Certik Listing
- Certik KYC
- Certik Audit

### PHASE III

- CoinGecko Listing
- DappRadar Listing
- Airdrop Campaign
- SEO
- 5,000 Token Holders
- 10,000 Token Holders
- 15,000 Token Holders
- 20,000 Token Holders
- 50,000 Token Holders
- 100,000 Token Holders

### PHASE VI

- Build Phase - dApp V2 Dashboard
- Deployment Phase - dApp V2 Dashboard
- On Ramp Integration
- Cross-Chain Integration
- Partnerships
- Development Mobile Application iOS and Android
- Launch Alpha Version Mobile Application iOS and Android
- DAO
- Merchandising
- NFT Collections

# TOHENOMICS

## TOHENOMICS

 **100% of Liquidity Pool will be Locked for a 1 year on Pinksale**

 **Circulating Supply:  
600,000 Box24**

 **DEVs  
FULLY DOXXED**

### **BUY TAX**

 Each buy transaction is taxed with 14% fee

**Automatic LP**  
2% of order fees return to liquidity

**Box Insurance Fund**  
5% of order fees are stored in BIF

**Treasury**  
4.5% of order fees go to the treasury

**Fire Pit**  
2.5% of B24 is burnt in the fire pit

### **SELL TAX**

 Each sell transaction is taxed with 16% fee

**Automatic LP**  
2% of order fees return to liquidity

**Box Insurance Fund**  
5% of order fees are stored in BIF

**Treasury**  
6.5% of order fees go to the treasury

**Fire Pit**  
2.5% of B24 is burnt in the fire pit
